Blockchain redefining Social Service

INTRODUCTION

Indico is a platform independent, autonomous social service DApp for a community of people who really want to contribute for the society.

It aims to use the technology of **Blockchain** and **Smart Contracts** to provide meaningful tasks to the user community and attaching a monetary value (indicoins) on these tasks approved by the community through a decentralized, unbiased and transparent voting process thereby incentivizing and encouraging the user community to undertake more such social tasks.

Indico has the potential to address certain limitations of the current processes by modernizing, streamlining and simplifying the traditional siloed design of the help and social service with a shared fabric of layers of technology for a first ever social platform where people can not only share but also validate through any kind of content anonymously from any part of the world at any part of the clock and also earn through it.

INDIAN MARKET SIZE

It is considered that India is a **SLEEPING GIANT** in the cryptocurrency market. It is expected that if the Indians are introduced to the Cryptocurrency and Blockchain Market according to the reports the market will boom to **1000% till 2019**.

0.1 Million

Around half a million citizens of India are aware of Cryptocurrencies and Blockchain and only few of them are actively involved.

1.2 Billion

There are over 320m domain names registered, with sales reaching multi million USD figures regularly.

40000% rise

According to reports the Market Cap would rise to about 4000% if the Indian population is actively involved in cryptocurrencies.

WHAT ARE CRYPTOCURRENCIES

New Money

Cryptocurrencies are digital money, created and held electronically. The most popular cryptocurrency is Bitcoin, but there are over 700 other currencies, many with better historical returns.

Digital Wallets

Each cryptocurrency is kept in a digital wallet specific to the currency. Few investors hold funds in more than a few currencies, since wallet management becomes risky and cumbersome.

Smart Contracts

Using digital smart contracts based on Ethereum, we can distribute dividends in a secure, automated and transparent way.

INDICOIN

The IndicoiN project recognizes that an extremely ignorant and inconsiderate amount of the human populations attention which plays a significant role in aggravating the inequalities inherent in our society.

We, at IndicoiN strongly believe that despite the long list of shortcomings that the human race faces, we are also very compassionate, if given an opportunity or a platform, we would stand up to be counted for a fellow human being who is in distress. Not all of us need to pack our bags and travel across oceans to help someone in need, we can also help and voice our opinion from our homes. All that matters is that our concern and care turns into an action or a movement towards betterment. Hence with this thought in our mind, we at IndicoiN aspire to work towards providing a broad platform for people from all walks of life from any part of the world. We hope to create an online platform where all of us can come together to contribute towards various causes that concerns all of us today by providing a platform where you can share any (kind of Proof) live videos, images, illegal documents leak, E-way bills for which our DApp will provide full anonymity in helping the real world or communities ecosystem in some or other way. As we think the qualities of a '**social worker**' is inherently grained in all of us. So one doesn't just need to get a University certificate or let's say work at a refugee camp to be called a Social Worker. Today with the help of technology's connectivity, we all can make our concerned voices heard.

By administering an efficient virtual platform that controls the power of digital currencies, blockchain ledgers, IPFS and physical world ethics we are enacting a completely individualistic and autonomic system, acquitted from the political quirks of any nation, that is capable of causing a positive impact on people's lives by allowing them to undertake tasks related to the welfare and upliftment of the society and also grant eloquent recurring income to all those eager to engage.

CHALLENGES AND MISSION FOR INDICOIN

Social sector perks by synthesizing with technology and providing a platform where one can simply earn by surfing on social network, by sharing things which has helped creating sustainability.

IndicoIn being the first impact of awareness of cryptocurrencies in India, is expected to further inflate trading volumes and cryptocurrencies' activities in India and the world by significant margins.

IndicoIn can give these people the opportunity to terminate poverty, improving the lives of their families by entering and helping create a new mobile digital economy.

With the government legalising it, cryptocurrency service providers will also be able to broaden the scope of usage. Currently, Bitcoins and cryptocurrency are used to make purchases through mobile apps, buy gift vouchers, for airtime top-up, and for paying bills. more acceptability of crypto in india would result in more volume growth in near future.

Improved framework provided by us would help support maintaining India and also providing an online income solutions for the country's unbanked and underserved population through technical stakeholders, creating proposal for the poor and illiterate so that they don't miss out with this reform.

CRYPTOCURRENCY GROWTH

2017

Ethereum

In 2017 alone, Ethereum grew from a price of \$10/ETH (January 1st, 2017) to \$400/ETH (June 12th, 2017).

2016-17

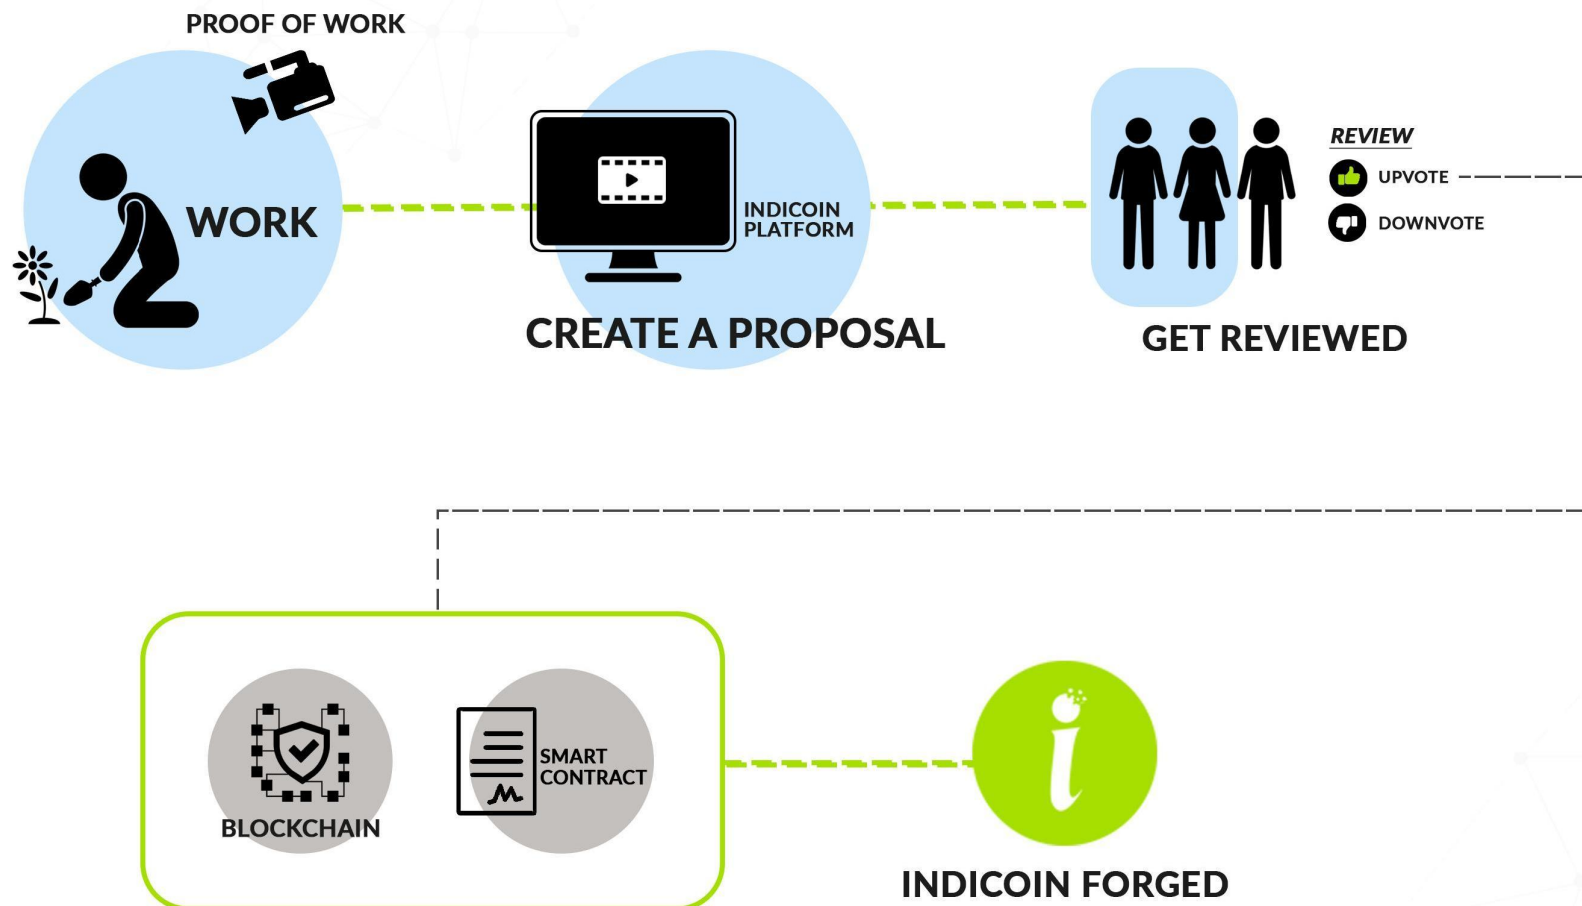

Bitcoin

From June 6th, 2016 to June 6th, 2017, Bitcoin grew from \$508/BTC to \$2,850/BTC.

HOW IT WORKS ?

PLATFORM STRUCTURE

FUND TIMELINE

10

ROADMAP

Quarter 2, 2017

- Concept development and Research
- Domain name registered

Quarter 3, 2017

- Whitepaper and platform development
- Initial Part Team creation
- Project initiated with local NGOs support & affiliation
- Community development

Quarter 4, 2017

- Non-Profit organization registration
- Token Presale
- Token Sale
- Distribution Plan Update
- Audit and Revision
- Community Plan Update
 - a. IndicoIn Comm-Tech conferences and token summit
 - i. initially Tour planned for India till December
 - ii. International summits organized by the community of specific location (integrated on platform itself)
 - b. Networks community Summit (all around the world)
 - c. Hackathon for project development
 - d. Bug bounties

Quarter 1, 2018

- Distribution protocol development
- Integrated and independent platform development
- Smart Contract for Social Vault development
- Collaboration with non profit organisations and other social partners
- Incubation and community center setups all over the world
